

## Zip Code Verifications

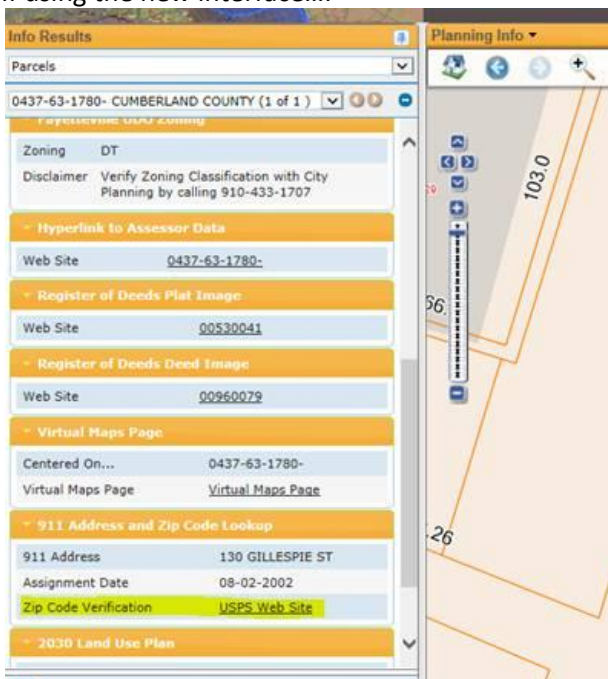

Our mapping site now has the ability to verify the USPS zip code for a found address. This only works when you have queried an address and is only under the Planning Info, TELCO and Board of Elections maps at this time.

If using the older interface it will show up as below under the 911 Address Info. (You may have to scroll down the left hand panel a bit)

Just choose the USPS Web Site Hyperlink and you should open a page that shows the official zip code data. Some very new address assignments and apartment complex addresses may not be in the USPS files though.

If using the new interface....
